

# SAFER TOGETHER

BGIS prioritises the safety of our people, vendors, clients and the communities in which we operate, through living our core safety values together.

Our goal is to drive a culture of zero injuries, as a result of our activities and operational performance.

**We will actively collaborate with all of our stakeholders to be safer together.**

Regards,

A handwritten signature in black ink, appearing to read 'Dana', followed by a long horizontal line.

**Dana Nelson**

**President and Managing Director, BGIS APAC**

## Core Safety Values

- Health and safety is a demonstrable business priority
- Health and safety must be included when making decisions
- The demands of a job are never too great to jeopardise safety
- Every worker is accountable for safety performance
- Worker involvement is essential
- Regular training of employees to work competently and safely is essential

# We have identified ten strategic objectives to achieve our safety goal:

1

## Continuous Improvement

Safety activities and control measures are planned, monitored and reviewed.

2

## Skills and knowledge

Workers have the competence and awareness to perform duties safely and effectively.

3

## Hazard management

Workplace and operational hazards are identified and effectively managed through the BGIS risk management program.

4

## Supply chain

Goods, works and services are purchased, delivered and utilised safely.

5

## Risk management

Arrangements to effectively manage and mitigate the outcomes of incidents, injuries, inspections and audits are maintained.

6

## Safety programs

Specific safety programs target high priority operational and workplace risks.

7

## People engagement

Workers are consulted about health and safety.

8

## Fit for work

Workers are fit and well to perform duties safely.

9

## Incident management

Safety incidents are reported, investigated and suitable actions taken to mitigate outcomes and prevent recurrence

10

## Place and equipment

Premises, vehicles, plant and equipment are regularly maintained and safe to operate
